

Esaren Global Ltd

Stronger bonds with unity & perfection

www.esaren.global

Introduction

- **Esaren Global Ltd (EGL)** is a leading entity having a multi-faceted business portfolio. Head-quartered in the UK and having branch operations in Bangladesh and Singapore – the company envisions to have a foot-print in a diverse range of business areas. Combining unparalleled experience, domain expertise, best practice referrals and comprehensive capabilities across various industries and business functions, the company collaborates with customers to help effectively, address operational challenges and grow stronger.
- **EGL** is a concern of “**Esaren International Group, UK**” and focuses mainly in the areas of:
 - **Project Management Consulting (PMC)**
 - **Venture management & Joint Ventures**

Mission

We aim to serve our clients strength
to strength.

Vision

Our vision is to become the best
version of ourselves, build a
fraternity of partners and customers
with purpose and efficacy.

Who we are

- At EGL, our primary focus was development of projects, whereby we partner with Engineering, procurement and construction (EPC) companies to offer infrastructure and supplying support to project owners. From feasibility to project execution – we can provide a diverse range of services to satisfy our client's requirements properly.

- At second step we branched into start-up and venture development activities with a Singapore based Fund Management presence as well.
- We can offer financing facilities to our clientele as well, which is in collaboration with our venture partners.

Our key competencies for Project Management

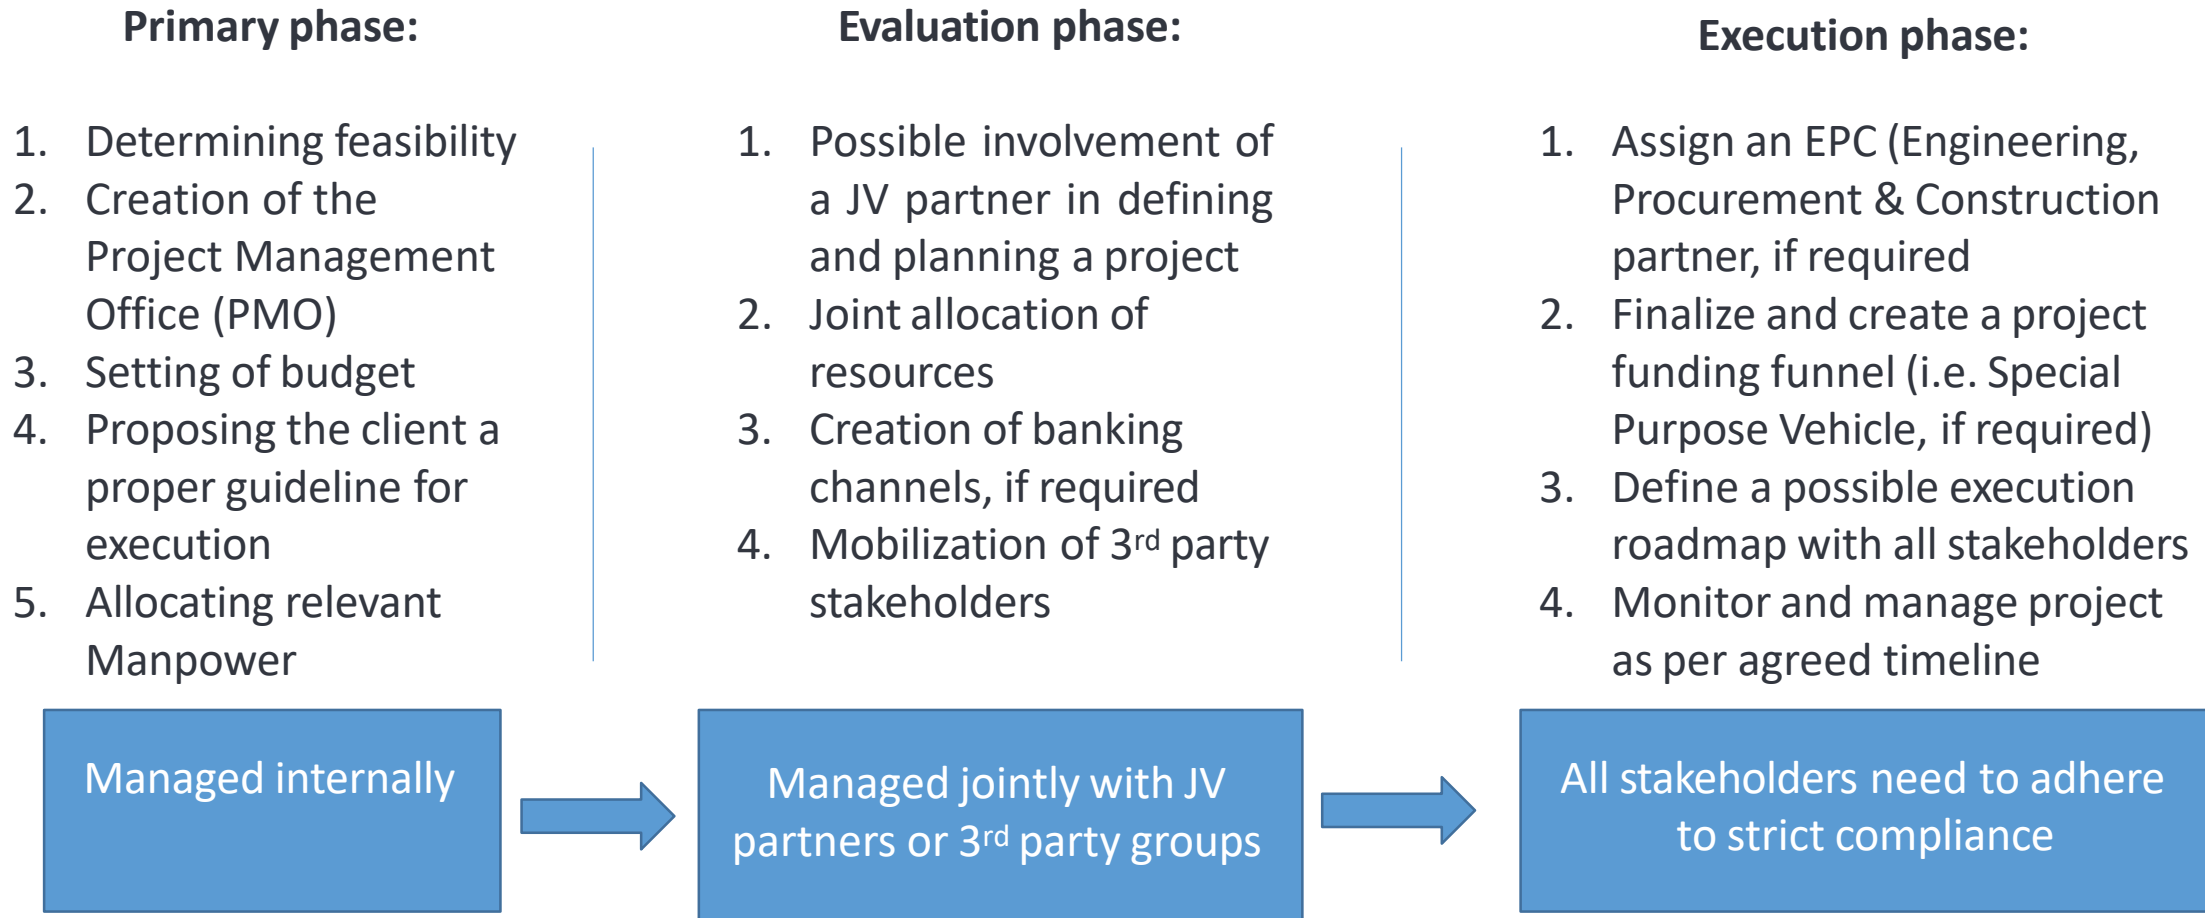

- **EGL** focuses on the consulting aspects of Construction & Communication Engineering (Road & Highways, Bridge, Steel Structures, Telecom etc.) as a market leader. The company has been involved in major construction & telecom service providing sectors in countries like Bangladesh, Turkey, Vietnam, Indonesia and Sri Lanka.
- **EGL** offers integrated, end-to-end, future-ready construction & telecommunication solutions that major partners rely upon for delivering revenue-generating services. We have earned a reputation for rendering uncompromising quality, flexibility and on time-bound budget based solutions. Known for our ability to translate client needs into scalable, flexible, cost-effective solutions, **EGL** builds project that increases the value of our partner's network infrastructure and reduce operating expenses.
- From construction, basic network infrastructure services to planning, coordinating and implementing complex construction, network integration projects, **EGL's** experience, professionalism, and efficiency, allows for unparalleled performance. With an unique team of industry leading talent, we have built and implemented a menu driven service model that allows our clients the maximum amount of flexibility when addressing their networking needs.

Project Management Consulting Cycle

Our stakeholders' procedure:

In order to successfully accomplish a project, EGL follows a strong adherence of the process flow in connecting all necessary stakeholders. From initialization to completion, EGL tags with required partner to properly and successfully execute a project. A possible step by step approach could be

Our key expertise

Our key expertise in consulting for infrastructure sector:

- Road & Bridge Construction
- Vehicular underpass construction
- Existing Bridge Rehabilitation
- Foot Over Bridges & Passenger Shed
- Guard Rail & Street Light Post
- Prefab Toll Plaza with Canopy
- RCC Tall Building Construction
- Gantry Road Sign & New Jersey Barrier
- Prefabricated Steel Building
- Telecommunication High Towers
- BTS Installation & Commissioning
- Earthing & Fire Fighting System Supply & Installation
- Transmission Line Towers (RC & ANC)
- Development Contractor

EPC components

Engineering Activities

This phase defines the project's scope, feasibility, and technical parameters.

- Project Initiation & Feasibility:**

Environmental Impact Assessments (EIA), site surveys, and concept master planning.

- Front-End Engineering Design (FEED):**

Defining the design basis, creating Process Flow Diagrams (PFDs), and establishing Approved Vendor Lists (AVL).

- Detail Design:** Drafting Piping & Instrumentation Diagrams (P&IDs), 3D modeling, equipment datasheets, and structural load

Procurement Activities

This phase focuses on acquiring the necessary goods, services, and raw materials required for the project.

- Vendor Sourcing:** Issuing Request for Quotations (RFQs) and conducting commercial and technical bid evaluations.

- Purchasing:** Awarding Purchase Orders (POs) and expediting the delivery of long-lead equipment (e.g., transformers, compressors).

- Logistics & Quality Control (QC):** Overseeing shipping, handling, customs clearance, and performing Factory Acceptance Testing (FAT).

Construction Activities

This encompasses the physical realization of the engineering designs on-site. [\[1\]](#)

- Site Preparation:** Clearing, grading, and establishing temporary facilities and site utilities.

- Civil & Structural:** Earthworks, pouring foundations, and structural steel erection.

- Mechanical & Electrical:** Equipment installation, piping fabrication, and electrical cabling.

Some of our completed projects: Roads, Bridges and Railways

1. **Bangladesh**: Road construction project management and consulting for Dhakla- Demra-Chittagong 6 lane highway. Project funded by JICA and World bank and major feasibility and project management supported by EGL where the contractor was Ital-Thai, a JV company from Italy and Thailand. Total project value: USD 122 million.
2. **Bangladesh**: Consulting and development of girder bridges and road foot bridges over Dhaka –Sylhet highway. The road component was also supported by development of toll booths and management services. Total project value was USD 60 million
3. **Kuwait**: EGL provided consulting support to Kabd-Sulaibiya Highway Upgradation project (Route 604) which is a major existing road network. This included work on the Kabd-Sulaibiya Industrial Link and extensions to the Sixth and 6.5 Ring Roads to accommodate traffic around the West Abdullah Mubarak housing development. Total project value: USD 32 million.
4. **Indonesia**: Provided consulting services for route feasibility and right of way planning for the construction work on Indonesia's Trans-Sumatra toll road project. The project is well underway and was completed in 2022. Work for the 614km of the route managed by Indonesia's government owned road management company Hutama Karya. EGL is an enlisted partner of Hutama Karya. The total project value was USD 160 million.
5. **Oman** : EGL was instrumental in consulting and project management services for the Sharqiyah Expressway (Sultan Turki bin Said Road) in Oman. Work progressed significantly on this route linking Al Kamil and Al Wafi to Sur. Portions of the road, including a 4km stretch to the Tahwa area where EGL provided key PMC support on consulting model. The total project value was USD 76 million.

Some of our completed projects: Infrastructure

1. **Bangladesh:** Construct, develop and operate a Floating Storage and Regasification Units (FSRUs) for liquefied natural gas (LNG). EGL was involved in the feasibility and consulting component in collaboration with ILF Consulting Engineers from Germany (www.ilf.com) and signed an agreement dated 8th May 2022 with Eastern Refinery Ltd .(ERL), Bangladesh, the lone oil refinery in the country to do the PMC for the Single Point Mooring (SPM) project. The project cost was estimated around USD \$ 760 Million financed by the Chinese Exim Bank.
2. **Malaysia:** EGL was involved in modernization and up-gradation of Kuching International Airport in Sarawak state of Malaysia. In collaboration with Alton Aviation, EGL was able to offer services in the line of developing a strategic airline hub and that the initial plan was to provide direct flights from Sarawak to some major global destinations. We are hoping to launch an airline company in collaboration with Alton and Hornbill Aviation, Malaysia, to develop a regional budget airline. The project was initiated in 2017.
3. **Indonesia:** EGL also conducted a survey for a nickel mine setup in Sulawesi area of Indonesia. The project had a major part in finding geological aspects of the mining as well as drilling plans and management of bio-diversity precautions. The 8 month long survey was initiated in 2022. The project value was USD 12 million
4. **Maldives:** Planning, Construction and Procurement of materials for Bodufushi resort and hotel project. EGL in collaboration with APECO, Singapore, concluded the hotel project including erection, management and delivery of the complete hotel. The project was completed in 2023. The project value was USD 46 million and was conducted in collaboration with Ozaltin Group, Turkey.
5. **Sri Lanka:** Erection and development of a 110 MW solar plant in Kandy. The project value was USD 221 million and completed in 2019 in collaboration with Roll Royce Power Ventures (RRPV), UK .
